www.hcob-bank.com (if you would like further information, please call +49 (0) 40 33 33-0)

Competent Authority: Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin), Germany

Date of Production of this Key Information Document: 13.06.2025

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type: The product is an over-the-counter (OTC) forward foreign exchange transaction on the basis of a Master Agreement between the client and Hamburg Commercial Bank AG under the relevant law applicable to the agreement.

Objectives: A foreign exchange swap transaction is an individual and separate contract, i.e. it is detached from any underlying transaction entered into between the customer and Hamburg Commercial Bank AG. Even though the terms and conditions of the product are adapted to the terms and conditions of an underlying transaction, this product is legally separate from any underlying transaction.

A foreign exchange swap transaction consists of a purchase / sale of a certain amount in a certain currency in the spot market and a sale / repurchase of the same amount on a forward basis. The difference between spot and forward exchange rate stems from different interest rate levels in the respective currencies.

A foreign exchange swap transaction may be entered into for the purposes of hedging the exchange rate on an underlying transaction, if the client expects that movements in exchange rate will be unfavourable to him on a certain settlement date. However, it can also be used to speculate on future movements in exchange rates and therefore gives rise to a currency risk, which may result in a theoretically unlimited negative market value. Another purpose of entering into a foreign exchange swap transaction may be to transform an asset or liability in one currency into an asset or liability in another currency for a specific remaining maturity. A purpose could also be to alter the maturity of an existing spot or forward foreign exchange transaction, where the advantage comes from higher liquidity in spot and swap markets in comparison to forward markets.

The following factors in particular - each of which can either have a separate or mutual increasing or reducing effect - have an impact on the product's success: change in the spot exchange rate, change in the interest rate level of the currencies concerned, change in the residual maturity.

Tabular presentation of the product

The following data, particularly with regard to the Performance Scenarios and Costs, are based on the following illustrative assumptions and need not be indicative of the specific agreement data. The transaction data are set out in the individual confirmation of the specific transaction.

Trade date	13.06.2025
Currency pair (Currency 1 / Currency 2)	EUR / GBP
Exchange rate	0,8507 GBP/EUR
Settlement date	13.06.2025
Client sells (Currency 1 / Notional Amount)	EUR 10.000,00
Client buys (Currency 2 / Notional Amount)	GBP 8.506,97
Premium- / Discount (swap rate)	+0,0102 GBP/EUR
Forward settlement date (Maturity date)	3 Monate / 13.09.2025
Forward exchange rate at settlement date	0,8609 GBP/EUR
Client buys (Currency 1 / Notional Amount)	EUR 10.000,00
Client sells (Currency 2 / Notional Amount)	GBP 8.608,72

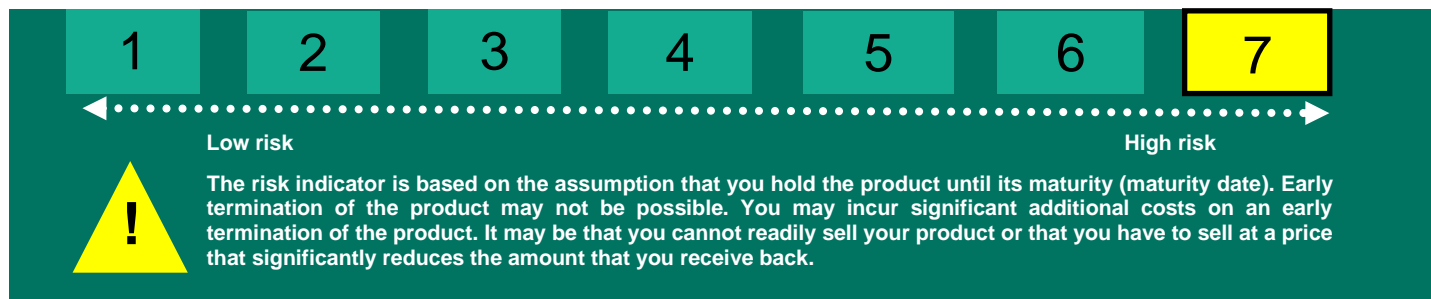

The product is concluded for a specific term. The specific term of the transaction is set out in the individual confirmation of the specific transaction. The Master Agreement is terminated in the event of the insolvency of one of the parties, as applicable. Early termination for serious cause is possible for example in the event of failure by either you or Hamburg Commercial Bank AG to make, when due, any payment under the agreement. In the event of such termination of the Master Agreement (and your product) Hamburg Commercial Bank AG will determine a close-out-amount and the payer. You can suffer a substantial loss from the product.

Intended retail investor

The product is aimed at retail clients (as defined in the German Securities Trading Act (WpHG), who intend to exchange foreign exchange cash flows for the agreed term to hedge or manage risks or to generate income. You should be able to economically compensate for or limit possible losses arising from this product to an acceptable level by entering into an offsetting transaction or other transactions under a general hedging strategy or by closing out or liquidating the product and should have extensive knowledge and/or experience with financial products.

2. What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level and poor market conditions are very likely to impact our capacity to pay you. This product does not include any protection from future market performance so you could incur significant losses. If (we) (are not able) to pay you what is owned, you could incur significant losses.

Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Nominal Amount		EUR 10.000,00	3 months (Recommended holding period)
Scenarios			
Stress	What you might get back or pay after costs		EUR -1.507,28
Scenario	Average return/ loss over notional amount each year		-47,71 %
Unfavourable	What you might get back or pay after costs		EUR -504,96
Scenario	Average return/ loss over notional amount each year		-18,59 %
Moderate	What you might get back or pay after costs		EUR -140,76
Scenario	Average return/ loss over notional amount each year		-5,47 %
Favourable	What you might get back or pay after costs		EUR 212,48
Scenario	Average return/ loss over notional amount each year		8,7 %

This table shows the money you might get back or pay on the end of the recommended holding period under different scenarios, assuming that you invest a nominal amount of EUR 10.000,00. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios for other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances. It does not take into account the situation where we are unable to pay you.

This product cannot be easily ended. This means, it is difficult to estimate how much you would get back if you end it before end of the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself and include the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Hamburg Commercial Bank AG is not able to make the payments?

The client is exposed to the risk of the insolvency of Hamburg Commercial Bank AG, i.e. overindebtedness, imminent insolvency or illiquidity. In the event of a threat to the continued existence of Hamburg Commercial Bank AG there exists the risk that Hamburg Commercial Bank AG cannot meet or only to a limited extent its obligations under this product and the underlying master agreement - also outside insolvency - due to the imposition of resolution measures by the administrative authorities. The competent resolution authority has extensive powers of intervention and can, inter alia, intervene with regard to Hamburg Commercial Bank AG's obligations under the product and underlying master agreement. It can terminate the underlying master agreement (resulting in the termination of your product as well), write off the single compensation amount in full or in part or convert the single compensation amount into shares of Hamburg Commercial Bank AG or transfer the product together with the underlying master agreement to a third party independent of Hamburg Commercial Bank AG. Please see www.bafin.de under the "liability cascade" heading with regard to the basic ranking of Hamburg Commercial Bank AG's obligations. The product is not protected under a statutory compensation or protection scheme or any other deposit scheme or any other type of guarantee.

4. What costs are incurred?

The Reduction In Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get performance of the product. The total cost take into account one-off, ongoing and incidental costs. The amounts shown here are cumulative costs of the product itself, until the end of the recommended holding period. They include potential early exit penalties for early termination. The figures assume you invest a nominal amount of EUR 10.000,00. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your notional amount over time.

Nominal Amount EUR 10.000,00		If you end the product at the end of the recommended holding period
Scenarios		
Total costs		EUR 58,17
Impact on return (RIY)		0,2 %

Composition of the costs

The table below shows the following:

- the impact of the different types of costs on the investment return you might get performance of the product at the end of the recommended holding period;
- what the different cost categories include.

The table shows the impact on the return			
One-off costs	Entry costs	0,2 %	The impact of the costs already included in the price. This is the most you will pay, and you could pay less. This includes the costs of distribution of your product.
	Exit costs	0,00%	The impact of the costs of your investment when it matures.
Ongoing costs	Portfolio transaction costs	0,00%	The impact of the costs incurred of us buying and selling underlying investments for the product.
	Other ongoing costs	0,00%	The impact of the costs that we take each year for managing your investment and the costs presented in Section II.

5. How long should I hold it and can I take money out early?

Recommended holding period: The product should be held until the end of the individually agreed term (13.09.2025).

The product does not provide for early termination. It can only be terminated by mutual agreement of the parties. Depending on the market value of the product you may have to pay or receive a termination price to/from Hamburg Commercial Bank AG for this. This termination price also includes termination costs and additional margin for Hamburg Commercial Bank AG. You are not entitled to terminate the product early.

In specific political or economic situations fungibility can be restricted, for example due to lack of market liquidity or other restrictions.

6. How can I complain?

Complaints regarding the product or Hamburg Commercial Bank AG as manufacturer, advisor or sales of the product can be sent by e-mail via our homepage www.hcob-bank.com/feedback_general headed "Complaint" or by post to Hamburg Commercial Bank AG, 20079 Hamburg, subject: Complaints. Or contact us personally by calling +49 (0)40 3333-0.

Complaints about the person that provides you with advice regarding the product or sells it to you can be addressed directly to this person or relevant company.

7. Other relevant information

General information on financial instruments is set out in the "Basic information on financial derivatives" brochure, which you can request free of charge at Hamburg Commercial Bank AG, 20079 Hamburg.
